

# Power-Kleen RI

## Rust Inhibitor

*Corrosion Protection for Steel & Iron Parts*

### GENERAL DESCRIPTION

Power-Kleen RI Rust Inhibitor is a concentrated parts rinsing chemical for flash rusting and corrosion protection of Steel, Iron, and Yellow Metal Parts. Power Kleen RI is a liquid that is injected into the rinse water. Highly effective with all Power-Kleen detergents.

### ADVANTAGES

- Protects parts from flash rusting immediately after drying
- Provide short-term corrosion protection for storage
- Concentrated for low usage and cost
- No silicone to cause paint adhesion or fish eye problems
- Does not require premixing
- Low odor and does not cause staining
- Does not inhibit or interfere with the cleaning process. Doesn't affect the cleaning chemical, No reduction in Cleaning power of your chemistry

### APPLICATION GUIDELINES

Power-Kleen Rust Inhibitor is designed for use at extremely low quantities:

- Mix ratio: .5 oz to 1 oz per gallon.
- Temperature 150 to 210°F. Recommend as hot as possible.

### PHYSICAL PROPERTIES (TYPICAL DATA)

Form.....Liquid  
Color (concentrate) .....Yellow  
Odor.....Mild

pH range of Working Solution.....11.5  
pH of concentrate.....Neutral

## MIXING INSTRUCTIONS

The recommended use for MART Power Washers, heat the water to at least 160 degrees. Rust inhibitor may be added to the rinse through the chemical injector pump by placing the pump feed tube into the Rust inhibit or container. Make sure the amount of chemical metered into the rinse does not exceed 2/3 oz per gallon of water in reservoir. This chemical may also be sprayed on to the part after washing. Avoid contact with chemical and solution. Avoid inhaling dust and fumes. Operate the wash cycle at 160 to 190 degrees F. Instructions can also be found on the Power-Kleen Rust Inhibitor label, MTS Website or reference the MART Power Washer Operating Manual for mixing in the washer.
