

MART CYCLONE 30 & TORNADO 40 Burner Update

Over time MART has provided several different style gas/propane burner systems for its Power Washers. Some of the older style burners are no longer manufactured and, for others, the repair parts are no longer available. To make certain that burners and spare parts are readily available for every Power Washer in service, MART now offers its 40 Series Burner System.

40 Series Burner System

The compact 40 Series Burner System is quality engineered to world class standards and is built for maximum uptime. It incorporates the most reliable combustion technology on the market. This High Efficiency Burner conserves energy and runs quiet, and provides trouble-free performance. An integrated electronic interrupted ignition and a powered automatic air shutter that eliminates heat loss, enhance efficiency even further.

The Burner delivers 180,000 BTUs per hour and is available in natural gas and propane. A complete burner system kit including an adapter mounting plate is provided with instructions for easy installation.
