

LUBRIPLATE 1444

MART Certified Grease for Inside the Power Washer

MART Engineering tested a large number of greases to find the one that performed best inside the MART Power Washer. Lubriplate 1444 grease is the clear winner, lasting longer in the PBM swivel and Turntable bearings than all other greases tested. This tacky, aluminum complex polymer grease is specifically formulated for a heavy-duty environment like the MART Power Washer. Excellent for the slow to moderate speed turntable bearings that are subjected to heat, steam, chemicals and water found in the MART. Lubriplate 1444 retains excellent grease performance in the hostile aqueous environment while its formulated special additives work to provide excellent protection against wear, rust and corrosion at the high temperatures found in a MART Washer. It provides outstanding resistance to washout from water and caustic washdown and it clings to metal surfaces better than other greases. Lubriplate 1444 delivers unparalleled lubrication and protection for the bearings inside your MART Washer.

We stock Lubriplate grease in 14.5 oz tubes # 51810, available individually or in cases of 10.

- **Greater Load Carrying Ability**
- **Outstanding Resistance to Washout**
- **Broad Temperature Range Protection**
- **Longer Service Life**
- **Greater Storage Stability**

LUBRIPLATE No. 1444 has received the National Lubricating Grease Institute's Certification Mark GC-LB. The GC-LB Certification Mark is the highest rating obtainable from the NLGI in its class.

Typical Properties:

Thickener: Aluminum Complex
Worked Penetration Range: 265/295
NLGI Grade 2
Texture: Smooth/Tacky
Color: Tan
Appearance: Opaque
ASTM Dropping Point: 500°F/260°C
NLGI GC-LB certified. High performance
